About

As a formally trained musician and passionate bar manager, I have a love for learning the inner working of all things. Having developed interpersonal, customer service, and group critical thinking skills, I would make not only an effective part of any team, but a great person to work for as well. Whether writing a song, crafting a cocktail, or coding, I relish figuring out the perfect formula to make something new and fresh.

Experience

General Assembly

New York, NY

Engineering Fellow

Dec 18-Mar 19

- Immersive, 12-week program with emphasis on constantly learning new technologies in a rigorous, project-based environment
- Worked within a team environment to develop full-stack applications with pair programming/group projects
- Exposed to Agile/Scrum project management method through UX collaboration on a website

Salt & Bone Smokehouse (Bareburger)

New York, NY
